All about Sea Turtles

Sea turtles live in almost every ocean in the world.

But these special animals are under threat. People are working to save them.

Sea Turtle Life Cycle

Sea turtles spend most of their lives in the ocean.

Female turtles return to the beach where they were born.

They dig deep nests in the sand.

They lay eggs in the nests.

Female sea turtles lay between 70 and 190 eggs in their nests.

Sea Turtle Life Cycle
